

Assignment 15

Please make sure for each java problem you solve, at the top in a comment block(see chapter 1 of the book), you make note of who you are, what the problem is, and how you plan on solving it.

Create a program that will create a 10x10 2-dimensional array. Programmatically insert the values of a 10x10 times table into the array and display the 2d array to the user. An example of a times table is below:

1	2	3	4	5	6	7	8	9	10
2	4	6	8	10	12	14	16	18	20
3	6	9	12	15	18	21	24	27	30
4	8	12	16	20	24	28	32	36	40
5	10	15	20	25	30	35	40	45	50
6	12	18	24	30	36	42	48	54	60
7	14	21	28	35	42	49	56	63	70
8	16	24	32	40	48	56	64	72	80
9	18	27	36	45	54	63	72	81	90
10	20	30	40	50	60	70	80	90	100
