

Assignment 1:

Please submit via the online course companion site by the beginning of the class it is due. Note that all programs that do pass compilation will automatically have points taken off. Each problem should have the question restated at the top in a comment block and also a brief description of how you plan on solving this problem. Please see the example java program I have provided.

Problem 1 (submit in the form of a .java file):

Write a program that will print the words “Hello World” to the console.

Problem 2 (submit in the form of a .java file):

Write a program that will print your name and your University of Redlands ID number to the console.
